

SUPPLEMENTARY TABLE[§]: Monthly suspected suicide attempts by self-poisoning among persons aged 10–19 years reported to U.S. Poison Control Centers and overall human exposure calls — United States, January 1, 2019–September 30, 2022[†].

	Suspected suicide attempts					Overall human exposure calls				
	2019	2020	2021	2022	p-value	2019	2020	2021	2022	p-value
January	7,921	8,610	9,069	9,424	<0.001	171,698	178,072	164,231	162,445	<0.001
February	7,719	8,582	9,835	10,183	<0.001	159,442	166,488	157,225	151,511	<0.001
March	7,775	7,675	10,256	10,200	<0.001	175,853	183,682	172,545	173,087	<0.001
April	7,945	6,302	10,627	9,239	<0.001	175,216	177,494	174,086	171,076	<0.001
May	7,913	6,606	10,919	9,225	<0.001	188,696	188,385	183,182	187,418	<0.001
June	6,122	5,986	8,189	6,889	<0.001	182,713	182,407	177,906	178,014	<0.001
July	6,135	6,778	7,725	6,825	<0.001	188,896	193,858	184,797	181,342	<0.001
August	6,310	7,445	8,123	7,658	<0.001	192,978	185,886	184,110	179,881	<0.001
September	7,609	8,769	10,111	8,893	<0.001	186,722	175,754	179,234	175,886	<0.001
October	8,027	9,503	10,522	-	<0.001	184,495	176,814	178,031	-	<0.001
November	7,687	9,034	10,604	-	<0.001	173,408	165,284	166,389	-	<0.001
December	7,375	7,980	8,684	-	<0.001	173,167	159,244	164,110	-	<0.001

[§]Months significantly different from the reference month are presented in bold. The year 2020 in the reference year for the months of April and May. The year 2019 is the reference year for the remaining months. P <0.05 was considered significant.

[†]Suspected suicide attempt related calls were lower during April and May 2020 compared to the same months of years 2019, 2021 and 2022. Comparing overall human exposure calls for the months of April, calls were highest in April 2020. Comparing overall human exposure calls for the months of May, the only significant difference is a decrease in calls between 2020 and 2021. Looking at the period from August to March: monthly suspected suicide attempt related calls during the pandemic were significantly higher than the corresponding months of 2019 except for the months of March and June 2020, where suspected suicide attempt related calls did not change significantly compared to March and June 2019. Overall human exposure calls were highest in 2019 for the months of August through December. Looking at the period of January till March overall exposure calls increased in 2020 and decreased in 2021 and 2022 as compared to 2019. Lastly, during June and July, overall exposure calls decreased in 2021 and 2022 compared to 2019.
